

Lightspeed Restaurant POS (K-Series) Implementation

Planning

We'll learn everything there is to know about your business so we can set you up for success

POS Configuration

Our Specialists will setup your POS according to the specificity of your business, and in record time! Your menu, your users, your floor plan- whatever your business needs are we will build for you.

Hardware Installation

Our certified partner will come to your space and professionally unpack, assemble and configure each register, including the terminals, stands, cash drawers, printers, and anything else.

Ongoing Education

Learning never stops! As you progress through your journey we'll continue to extend your knowledge. You chose where to focus your energy & time

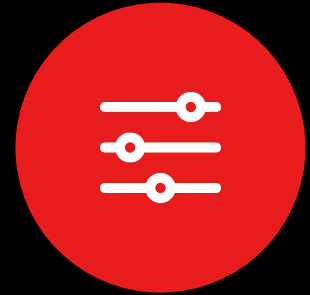

POS Configuration - What's included?

As soon as we have all the information we need about your business, our team of experts will start working on your POS to configure up to your standards and expectations.

What our team will configure:

- Business type
- Menu
- Floor Plan
- Users & Permissions
- Account Settings
- Kitchen, Printing
- LS Payments
- Business-specific workflows

Turnaround time for a full config:
5-7 Business Days

Hardware Installation - What's included?

One of our certified installation partners will come to your space and professionally install your POS.

The partner will complete the following:

- **Hardware Installation** - Unpack, assemble and configure each register, including the terminals, stands, cash drawers, printers, KDS, payment terminals, and anything else on your quote.
- **System Configuration** - Log in to the system, configure the software settings and connect any included peripherals.
- **Comprehensive Testing** - Confirm key aspects of the POS—like transactions and receipt printing—function as expected.

Installation can only be scheduled once hardware has shipped
